## TEAM BUILDING & CORPORATE EVENTS

# 01 | CONCEPT

## THE ESCAPE GAME

Do you want to give your employees an original experience? Create bonds and build team spirit? Bring them out of their comfort zone?

Mixing work and relaxation, Escape Games are an innovative concept to unite a team around a fun activity: ideal for a successful team building event.

Because of their short format, our games fit perfectly into your corporate events (strategic meetings, seminars, cohesion sessions, training, etc.).

## CONCEPT

During the game, the hierarchy no longer exists, only collaboration counts.

It is a context where the issues will push everyone to reveal themselves, express innovative ideas, solve problems and leave the room motivated and stimulated.

To succeed in their mission, the team will have to demonstrate excellent communication, an acute sense of observation, a quality of reflection, and a management of stress without flaw.

## 02 | SKILLS THAT YOU MUST USE DURING AN ESCAPE GAME

### CREATIVITY

Observe details and adopt a new point of view. Step out of your comfort zone.

### CRITICAL THINKING

Know how to grasp a problem in a critical way: question and question again. Avoid ready-made solutions by analysing the situation.

### COOPERATION

You need to pool your skills to make progress. Playing as a team is the key to success.

### COMMUNICATION

Share information and reflect together to reach the common goal.

# 03 | BENEFITS

# 04 | OUR GAMES

## LIFE SENTENCE

You are sentenced to life in a maximum-security prison. With all appeal requests denied, your only path to freedom is to escape.

## ZODIAC KILLER

Captured by a serial killer, tied up & left in his lair, escape is your only chance. Has the real Zodiac Killer returned from the 1970's or is this the work of a copycat?

## BUNKER

Early 80's, the Cold War. A nuclear launch sequence has been initiated from the bunker. Your team of special agents are sent to stop the launch at all cost.

## Zombie Lab

A lethal man-made virus is turning healthy people into infected zombies. You are a team of scientists who need to find the cure before the zombies break into your laboratory.
